EXPERTISE

Troubleshooting & Debugging React & JavaScript Development

Firebase & Database Management

API Integration

Ticketing Systems & Workflow Design

Automation (Zapier, Calendly)

UI/UX Design Principles

GitHub Version Control

EDUCATION/ CERTIFICATION

SOFTWARE ENGINEERING TECHNOLOGY (ADVANCED DIPLOMA)
CENTENNIAL COLLEGE — TORONTO, ON
EXPECTED - APRIL 2027

SOFTWARE ENGINEERING TECHNICIAN (DIPLOMA)
CENTENNIAL COLLEGE — TORONTO, ON
COMPLETED - DEC 2025

GOOGLE UX DESIGN CERTIFICATION
COMPLETED - JULY 2025

SUMMARY

Full stack developer specializing in TypeScript based applications using React and Next.js. Experienced in building scalable web applications and SaaS platforms with strong focus on clean architecture, performance, and maintainability. Proven ability to deliver production ready solutions for real clients while implementing efficient data flow, reusable components, and modern UI systems.

PROFESSIONAL EXPERIENCE

FREELANCE WEB DEVELOPER — JANUARY 2025 – PRESENT

Self-Employed / Contract

- Designed and developed full stack applications using TypeScript, TSX, React, Next.js, and Firebase
- Built booking systems and e-commerce platforms with authentication, database integration, and payment processing
- Integrated REST APIs and third party services including Stripe, Calendly, Zapier, and Google Sheets
- Developed strongly typed components and scalable frontend architecture using TypeScript and TSX
- Structured backend data and application logic for maintainability and performance
- Deployed and maintained applications using Vercel and Firebase with production configuration
- Improved application performance, responsiveness, and user experience across devices
- Translated business requirements into scalable technical solutions and clean UI implementations

CLIENTPULSE SAAS DASHBOARD

Personal Project

- Developed a SaaS platform using TypeScript and Next.js for client analytics and reporting
- Built modular and reusable TSX component architecture for scalable UI systems
- Implemented structured data handling and consistent state management patterns
- Focused on performance optimization, clean code structure, and maintainability

IT HELP DESK TICKET SYSTEM

Personal Project

- Built a full stack ticketing application using TypeScript with structured data models
- Implemented ticket workflows including creation, status tracking, and admin controls
- Designed system logic to reflect real world application flow and user interactions
- Applied strong typing and component separation for scalable code organization
